Dallas, TX | niseem2008@gmail.com | 214-797-7330

EDUCATION

Junior | Greenhill School, Addison, TX

GPA: 4.01 Expected Graduation: May 2027

Relevant Coursework: AP Calculus BC, AP Physics 2, AP Computer Science A, Honors Applied Computer Science, Honors UX Design, [Harvard AI Bootcamp](#), [Harvard CS50P](#)

SKILLS

Languages: Java, Python, JavaScript, HTML, CSS

Tools: Git, GitHub, Visual Studio Code, Raspberry Pi, Figma, Framer

Frameworks & Libraries: React, Next.js, Flask, scikit-learn, Pandas, NumPy, PyTorch, PyAutoGUI

Databases: MySQL, SQLite

EXPERIENCE

Datacolor.ai, McKinney, TX

May 2025 – August 2025

Software Engineering Intern

- Built a grant search platform integrating federal and private APIs with MySQL for caching and retrieval
- Implemented AI-powered matching using OpenAI API to generate nonprofit compatibility scores
- Developed a full-stack web application with a Flask backend and React frontend
- Added PDF upload and AI-driven analysis to extract and summarize grant applications

InzpireU, Remote

June 2025 – August 2025

Web Scraping & Data Extraction Intern

- Built automated web-scraping pipelines using Python, Requests, and BeautifulSoup with authenticated access
- Parsed, cleaned, and structured large grant datasets into JSON and database-ready formats
- Developed scalable ingestion workflows with duplicate detection and data consistency checks
- Streamlined grant data collection processes to improve reliability and efficiency

PROJECTS

Python Chess Puzzle Auto-Solver Bot | [GitHub](#) | [Demo Video](#)

November 2025

- Built a Python chess bot using Stockfish, PyAutoGUI, and OpenCV to solve on-screen puzzles
- Used computer vision to detect board state and piece positions from live screen captures
- Translated visual board data into FEN notation to drive engine-selected moves
- Integrated automation and vision to move the mouse autonomously for repeated puzzle execution

Diabetes Risk Prediction & Progression Modeling | [Colab Notebooks](#) | [Display Board](#)

May 2025 – Present

- Trained a logistic regression model on 986 patient records to predict diabetes risk, achieving ROC-AUC ≈ 0.85
- Engineered a leakage-corrected stage classifier using scaling, imputation, and stratified validation
- Built a simulated weekly progression engine modeling deterioration and intervention risk scenarios
- Conducted research under mentorship of SMU professor Kasi Periyasamy; competed in Dallas Regional Science Fair

MedSight (HackSMU VII Winner) | [Devpost](#)

April 2026

- Built an AI platform that converts smart-glasses data into behavioral insights for physicians
- Developed computer vision and LLM pipelines to quantify activity, engagement, and distraction
- Designed a multi-layer analytics system for trend detection and longitudinal monitoring
- Won Best Use of ElevenLabs at HackSMU VII among competing student teams

LEADERSHIP & COMMUNITY INVOLVEMENT

Table of Hope Dallas, Texas

January 2025 – Present

Co-Founder

- Co-founded a nonprofit focused on cooking and delivering meals to underserved communities
- Designed and launched the organization's website using Framer, managing layout, branding, and content
- Prepared and distributed 1,000+ meals alongside a volunteer team
- Raised over \$4,000 and led social media efforts to promote events and grow community engagement
